Location: San Francisco, CA

SUMMARY
Senior AI Systems Engineer with 4+ years of experience developing autonomous multi-agent frameworks, scalable RAG architect

CORE COMPETENCIES
- Programming & Query: Python, TypeScript, SQL, Bash
- AI & Deep Learning: PyTorch, Hugging Face Transformers, LLMs, RAG, LangGraph, LangChain, Vector Databases (Chroma, P
- Infrastructure & Backend: FastAPI, Docker, PostgreSQL, Redis, REST APIs, Git, Linux

EXPERIENCE
Lead AI Systems Engineer ? Cognitive Matrix Labs (2022 ? Present)
- Architected cyclical LangGraph agent workflows processing 500k+ customer research interactions monthly with human-in-the-loo
- Engineered hybrid vector and lexical retrieval (RAG) using pgvector and ChromaDB, reducing latency by 45% and eliminating ha
- Fine-tuned quantized Llama 3 and Mistral models using LoRA and QLoRA for domain-specific contract analysis.

Machine Learning Engineer ? Synapse Intelligence (2020 ? 2022)
- Built automated evaluation benchmarks comparing model outputs using PyTorch and Hugging Face.
- Created microservices with FastAPI and Docker deployed onto Kubernetes clusters with automated CI/CD pipelines.

PROJECTS
- MultiAgent-Orchestrator: Open-source hierarchical supervisor agent with state checkpointing and SQLite memory persistence (1
- SemanticCodeRAG: Terminal-based semantic codebase indexing tool using sentence transformers and tree-sitter.

EDUCATION
B.S. in Computer Science ? University of California, Berkeley (2020)
